UCSF Newsbreak

Radioactive Research Approved for UCSF Laurel Heights Lab

Our campus received permission the first week of July from the Radiologic Health Branch of the California State Department of Health to use radioactive materials for biomedical research at our Laurel Heights campus.

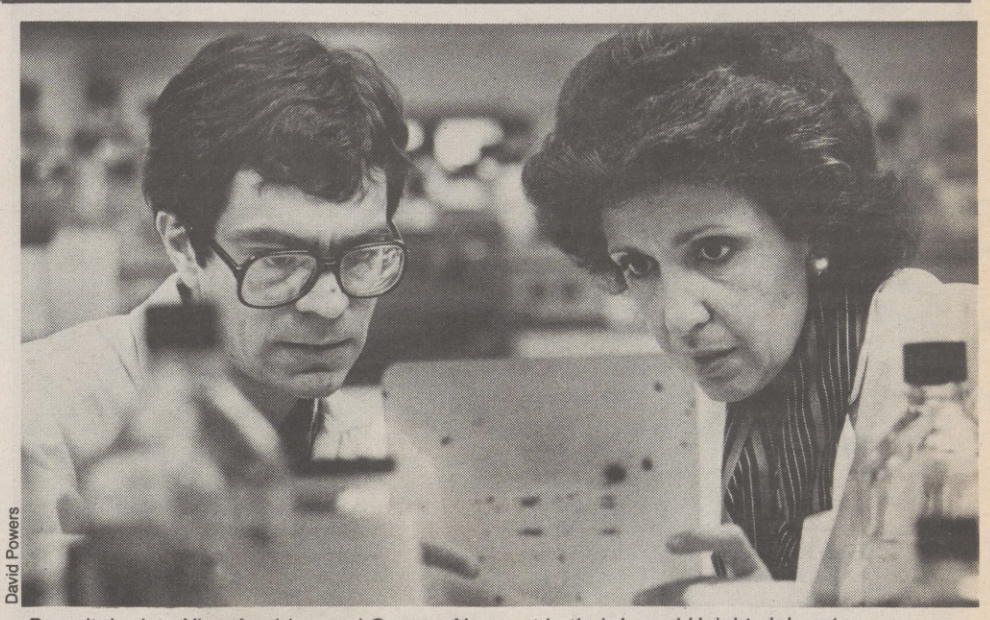
State Health Director Ken Kizer approved UCSF's application for an amendment to our radioactive materials license, which allows the Intercampus Program in Molecular Parasitology, directed by Nina Agabian, to use such materials.

The Laurel Heights Improvement Association had tried to block the laboratory experiments, contending that nearby residents could be exposed to harmful levels of radiation.

"The quantity and type of radioactive materials to be used at the Laurel Heights facility pose extremely low risk," Kizer said in a statement. "In the very unlikely event of release to the environment, levels would be well below existing regulatory limits."

The radioactive isotopes will be used in experiments designed to learn more about such parasitic infections as malaria, African sleeping sickness, chlamydia, giardiasis, schistosomiasis, and travelers' diarrhea.

Bruce Spaulding, vice chancellor for university advancement and planning, said, "The State Health Department now recognizes that our procedures for dealing with radioactive materials are comprehensive, and that there is no danger to our neighbors from the use of tiny quantities of radioactive isotopes in biomedical research."



David Powers

Hughes Fellows (back row, left to right) Andrew Metzger and Matthew Kulke; (front row, left to right) Mark Diamond, Michael Zegans, Daphne Haas and Dirk Schermer.

UCSF's New Howard Hughes Fellows

Six third- and fourth-year medical students at UCSF are among 47 nationwide selected by Howard Hughes Medical Institute to receive Medical Student Research Training Fellowships. They will extend their studies to devote a year to full-time research in laboratories on campus. The program's purpose is to expand the pool of medically trained researchers for future achievement in biomedical research.

- Andrew Metzger will work in Martin Cogan's lab investigating the role of DNA alterations, specifically of tumor supressor genes, in pediatric brain tumors.
- Mark Diamond will work on the analysis of the enhancer region of the glucocorticoid receptor in Keith Yamamoto's laboratory.
- Matthew Kulke will study the molecular biology of voltage-sensitive ion channels in Lily Jan's laboratory.
- Michael Zegans will investigate the intracellular trafficking of MHC-1 molecules in Geoffrey Davis's lab.
- Daphne Haas will be working on oncogenes in Michael Bishop's lab.
- Dirk Schermer will study the role of parathyroid-like protein and embryonic differentiation in calcium metabolism in Gordon Strewler's lab.

Do You Have Asbestos in Your Area?

For years builders and contractors used asbestos for insulation, unaware of the associated carcinogenic dangers and pulmonary diseases. Most UCSF buildings, with the exception of Long Hospital, the Vision Research Center and the School of Dentistry building, contain asbestos in some areas, mostly around steel girders, pipes, ducts, boilers, tanks, some ceilings and walls, as well as fire doors.

"If these materials do not become frayed or crumbled through construction activity, water damage or the like, asbestos will not be released into the workplace," explains Roy Balzer, assistant vice chancellor, Office of Environmental Health & Safety. He further says, "There are primary barriers, for example walls and ceilings, which separate asbestos from the work place, and if left undisturbed they will prevent asbestos particles from penetrating the workplace."

Meanwhile, letters have been sent to all campus employees detailing UCSF policies related to asbestos.

The University has conducted several surveys listing specific locations where as-

(continued on page 2)

Symposium on New Uses for an "Old" Tool Highlights Mass Spectrometry Week

Our campus will host an international symposium from Sunday to Thursday, August 27 to 31, in San Francisco's Fairmont Hotel to discuss the application of an old scientific tool—mass spectrometry—to the fields of biology and medicine.

The Second International Symposium on Mass Spectrometry in the Health and Life Sciences, organized around the dedication of UCSF's state-of-the-art mass spectrometer, will bring together university and industry scientists who are designing new mass spectrometry instruments, and those using the instruments to expand our understanding of drugs and the body's own chemicals.

Mass spectrometers are generally used to find the mass or weight of a molecule or atom, for example to identify an unknown chemical or to determine the composition of an unknown substance. These instruments played a key role in analyzing rocks brought back from the moon 20 years ago—an enterprise that was headed by conference organizer Alma L. Burlingame, now a UCSF professor of pharmaceutical chemistry.

Thanks to new technological advances, however, mass spectrometers are becoming faster and more powerful, Burlingame says. They now can analyze larger molecules, such as proteins and complex sugars that are an important part of living things.

The new instrument installed at UCSF this year, a so-called tandem mass spectrometer (MS/MS), is powerful enough to sequence proteins—one of the fundamental steps of biological research.

Symposium speakers include *Science* editor Daniel E. Koshland, Jr.; Charles R. Cantor, director of the Lawrence Berkeley Laboratory project to sequence the human genome; and Victor Ginsburg, a researcher from the National Institutes of Health who is an authority on cellular markers for cancer.

A workshop to bring scientists and students up to date on the basic principles of mass spectrometry as applied to biochemical questions will be held Friday and Saturday, August 25 and 26, at Laurel Heights.

Kicking everything off will be a dedication of UCSF's MS/MS facility, also to be held that Friday, at 10:30 a.m. in Toland Hall. The director of NIH's Division of Research Resources, which funded the MS/MS along with the National Science Foundation, and Dean Jere Goyan of UCSF's School of Pharmacy, will be present.

For further information call Marilyn Schwartz at x62582.

Special "125th Flashbacks" Series Begins Sept. 16; Volunteers Needed for Oct. 14

Beginning in the September 16 issue of *Newsbreak/Medsounds,* we will be running a special series entitled "125th Flashbacks." These short articles, or vignettes, will take us back to previous days of UCSF. We will be attempting to show you a retrospective of where we were years ago, and how far we've come since our inception in 1864.

If you have any interesting details on UCSF's past, please call us at x61541.

We, of course, also will be bringing you regular news items on all the great activities surrounding our 125th birthday bash to be held on Saturday, October 14. You won't believe what we have planned . . . from a huge science and health expo to exquisite food from 20 top Bay Area chefs, from a giant birthday cake from Just Desserts to the fine jazz vocals of Faith Winthrop, from encore performances of that Off-Broadway hit "Party of One" to our "Tunnel through Time" exhibit. We could go on. And we will! So stay tuned.

Meanwhile, our Volunteer Office is beginning to collect names of people who would like to volunteer to help on October 14. With nearly 7,000 people expected to be celebrating with us on campus that day, we will need lots of volunteers. Just fill out the form below and mail it to the Volunteer Office, Box 0290, by Tuesday, August 15.

"English Only" Complaint Resolved

Our campus and the Equal Employment Opportunity Commission have announced settlement of complaints filed last June by campus employees who charged that they were discriminated against and reprimanded for speaking in languages other than English.

Under terms of the settlement, UCSF has agreed to reinforce its existing policy on language spoken in the workplace. Specifically the campus will:

- Clarify its procedures regarding speaking English only.
- Post its "Policy on Nondiscrimination Regarding Language Spoken in the Workplace" in conspicious places.
- Remove any posted workplace rules which announce an English only rule.
- Issue the policy to each campus employee.
- Remove from the charging parties' personnel files any and all documents and entries relating to the facts and circumstances which led to the filing of the complaint and/or related to the use of language other than English in the workplace.
- Conduct training of managers and supervisors in the units named in the complaint on the campus's policy against English only rules.
- Conduct a survey of each department on campus to determine whether an English only rule, policy or practice has been in effect any time since Janaury 1, 1988.
- Schedule and coordinate cultural sensitivity training for all heads and supervisors in departments and units in which there recently has been an English only problem. The training will be available on a volunteer basis.

According to Michael Adams, assistant vice chancellor, Affirmative Action & Equal Opportunity, the campus has never had an official policy requiring that employees speak English only.

Part of the winning team: (front row, left to right) Andy Evangelista, Bob Sanders; (second row, left to right) Carol Fox, Corinna Kaarlela, Sanna Craig, Janet Norton, Allen Balderson; (back row, left to right) Alice Trinkl, Jeff Miller.

News Department Takes Six Awards in National CASE Competition

The News & Public Information Services Department has won six awards, including two gold medals, in the latest competition of the Council for the Advancement and Support of Education (CASE) out of Washington, DC. The competition includes publications and other vehicles of communications from universities across the country.

This makes a total of 43 national CASE awards the department has received under the direction of Michela Reichman, assistant chancellor of communications.

For news coverage, the department won a gold medal for "research coverage and the news media" and a silver medal for "excellence in news writing." The prize-winning news team, headed by director Carol Fox, includes senior public information representatives Andy Evangelista, Patricia Forsyth, Corinna Kaarlela, Robert Sanders, Alice Trinkl and Sanna Craig.

The *UCSF Magazine* was awarded four medals: A gold for "best article of the year," "Eyes of Egypt" by Robert Sanders in the August 1988 issue; a silver for photo essays by freelance photographer David Powers in the February 1989 issue featuring the 75th anniversary of the Department of Pediatrics; and two bronze for the same issue, one for "periodical special issues" and another for "individual illustrations." The latter, awarded for freelance illustrator James Dowdalls' drawings for the article "Highways of the Minds," was the first CASE award to be issued to UCSF in this category.

The *UCSF Magazine* staff includes editor Michela Reichman, managing editor Jeff Miller, assistant editors Allen Balderson and Jeanne Duell, freelance designer Henry Wachs and freelance photographers David Powers and Paul Fusco.

In another competition, Janet Norton, director of Institutional Relations, has won the gold medal in the Employee Communications Program category of the 1989 Healthcare Advertising Awards Competition for coordinating the UCSF AIDS Awareness Week program. The competition was sponsored by the *Healthcare Marketing Report*.

Dental Staff's "Rewarding Experience"

What does one do about outstanding staff employees? You reward them of course. At least that's what the School of Dentistry clinics on Parnassus did the other day. (Left to right) Elizabeth Santos, Jeanne Gonzalez, Al Gianinno, Ruth Saldana and Audrey Chin all received $100 gift certificates to Macy's.

Chancellor's Summer Youth Program Ends Aug. 18

Ninety-five high school students from the San Francisco Unified School District are now on campus through August 18 participating in this year's UCSF Chancellor's Summer Youth Program. The students are interspersed in 73 different campus and Medical Center departments.

The youths in the program are generally from economically disadvantaged families, who in exchange for their time and effort, earn federally funded wages and acquire some job experience—and in some cases, even a career path.

This is the 21st year the campus has offered summer jobs to high school students. Bob Rojas, Personnel's outreach recruitment coordinator, who heads the program, estimates some 2,000 students have worked here since the program began.

Jennifer Molina (center) is working in the Department of Ophthalmology's library with administrative assistant Elizabeth Settel (left) and librarian Janice Perlman-Stites (right). Jennifer will be a junior at Balboa High School this fall.

Lynh Huynh (center), a senior at McAteer High School, shown here with 8 Moffitt head nurse Margie Wolcott and assistant head nurse Meg Knapp, is one of two students working on the neurosurgery nursing unit this summer. For the past two years, Margie and other head nurses have accompanied Bob Rojas to the high schools to recruit especially for the nursing units in the Medical Center.

State Budget Cut Closes Teen Clinic

A recent state budget cut has dramatically reduced the funding for the state Office of Family Planning by nearly two-thirds, from $32.6 million to $12 million, which effectively shuts down one clinic and curtails services at a second one at SFGH.

More than 70% of the funding for the Family Planning Clinic and its teen division at SFGH comes from this state office. The budget cut closes down the Teen Family Planning Clinic, which almost certainly will cause an increase in teen pregnancy, says Philip D. Darney, professor of ob/gyn, who directs both family planning clinics at SFGH.

The larger Family Planning Clinic at SFGH will continue to operate, and will attempt to help as many of the Teen Family Planning people as possible. But these cutbacks will reduce substantially the access to the clinic.

In addition, the cut will deeply affect contraceptive services, male and female sterilization operations, infertility help, breast and cervical cancer screening, screening and treatment for sexually transmitted diseases, as well as services at the SFGH Women's Health Clinic.

Laboratory for Cell Analysis Open House

What are you doing on Friday, August 4? Why not save part of that afternoon to check out the expanded Laboratory for Cell Analysis at CED. There will be an open house in Room 230 beginning at 3 p.m., which will include demonstrations of cell sorters and image analyzers. Be sure to call Bob Burgess at x66703 if you plan to drive. He will be able to arrange parking for you in the CED lot.

UCSF/Hanover Corporate Run

Competitive and casual runners alike are invited to join in the fun during UCSF's fifth year of competition in the Manufacturers Hanover Corporate Challenge. Slated for Wednesday, August 16, beginning at 7 p.m., the 3.5 mile run starts at the Embarcadero and weaves through the downtown streets of San Francisco. The deadline date to register was July 21, however late registrations will be accepted until August 8. For further information call Jimmy Choy at x61700 or Alan Tower at x61800.

Asbestos *(continued)*

bestos might be encountered on campus, detailed instructions on working with asbestos, as well as bulk sample analysis figures and air monitoring results. All of these are available for review and photocopying in the Office of Environmental Health & Safety. For further information call x60571.

UCSF *Newsbreak*

UCSF (ISSN0891-6063) Volume 4, Number 13, July 29-August 25, 1989. Published by the University of California, Third and Parnassus, San Francisco, CA, 22 issues per year—biweekly, except monthly June, July, August and December. Second-class postage paid at San Francisco, CA. Postmaster send address changes to *UCSF Newsbreak*, News & Public Information Services, University of California, San Francisco, 513 Parnassus, Room S 20, San Francisco 94143-0462.

Deadline for the next issue, which will cover August 26-September 15 (three weeks) will be on Tuesday, August 15, at 11 a.m. Please send campus news copy to Allen Balderson, Medical Center news to Dawn Finch, and calendar and gazette items to Donald Hickerson, all at Box 0462. Last-minute copy can be taken over the telephone by calling x61541 or x62557.

Honors & Awards

Ernest Newbrun, professor, oral biology & periodontology: Installed as president of the International Association for Dental Research at the organization's 67th general session in Dublin, Ireland on July 1. Newbrun also is author of the textbook *Cariology*, which has just gone into its third edition.

Carroll L. Estes, professor & chair, social & behavioral science; director, Institute for Health & Aging: Elected chair-elect, Section on the Sociology of Aging, American Sociological Association.

Walter L. Miller, professor, pediatrics & Metabolic Research Unit: Elected member of the American Pediatric Society and of the Association of American Physicians.

Nancy W. Zinn, head, library special collections; university archivist: Invited speaker at an NIH meeting on *AIDS & the Historian*, where she presented a paper on "Documenting AIDS: The Role of the University & Other Agencies," Mar. 21 in Bethesda. She also has been appointed to the advisory board of the Labor Archives & Research Center at SF State, which records local labor activities.

Ronald L. Siegel, assistant professor, pharmacy & pharmaceutical chemistry: Winner of the 1989 Controlled Release Society Young Investigator Research Award in recognition of his work on polymeric drug delivery systems. This is the second year in a row this annual award has been won by UCSF. Last year's winner was pharmaceutical chemist Richard Guy.

Howard L. Fields, professor, neurology & physiology: Winner of an Alcohol, Drug Abuse & Mental Health Administration Merit Award, consisting of up to 10 years of research support for his work on "The Neural Substrate of Opiate Analgesia."

David A. Greenberg, associate professor, neurology: Elected to the American Neurological Association.

William C. Mobley, assistant professor, neurology & pediatrics: Elected to the Society of Pediatric Research. He also was an invited speaker at the 20th anniversary of the Johns Hopkins Neurology Department, June 6.

Susan B. Kornblatt, coordinator, Academic Geriatric Resource Program: Winner of the 1989 Community Programs Award from the American Heart Association, SF Chapter, for her work on community programs for stroke prevention, awareness and education.

George C. Stone, professor, medical psychology; director, graduate academic programs in psychiatry: Keynote speaker at the Fourth Annual Meeting of the Japan Academy of Health Behavioral Science, June 24 in Tokyo.

Linda Civitello-Joy, community services liaison, Office of Public Service Programs: Appointed to the board of directors, American Lung Association, SF Chapter.

Guenter B. Risse, professor & chair, history of health sciences: 1989 George Dock Lecturer, sponsored by the Barlow Society for the History of Medicine, Friends of the History of Medicine and Friends of the LA County Medical Association Library, May 18 in LA.

Service Awards

Service awards are issued on staff members' tenth anniversary of employment (or longer, in increments of five years). Names are provided by Personnel as awards are processed. Campus and Medical Center departments should send criteria to Personnel as employees become eligible for service awards.

Marshalen Martin, 20 years, pharmaceutical services.

Nancy L. Montoya, 10 years, neurology.

Roselyn Nelson, 20 years, pharmaceutical services.

Rachel B. Nelson-Simmons, 13 years, dental clinics.

Lin Ngau, 15 years, materiel services.

Mai T. Phan, 10 years, AIS.

Lita J. Ramos, 10 years, pediatrics.

Linda L. Rodgers, 10 years, dermatology clinic.

Charlene Sawyer, 10 years, environmental services.

Patrick Sayerwin, 20 years, accounting.

Pui Seto, 10 years, medicine.

John W. Shaber, 15 years, environmental health & safety.

Shirley Sio, 15 years, materiel services.

Carolyn A. Somelofski, 20 years, cardiology.

Carrie L. Stapleton, 20 years, environmental services.

Ellen R. Tillman, 20 years, medical records.

Lester M. Turner, 20 years, physical therapy.

Eric B. Vermillion, 10 years, physical plant.

Jane Wertzberger, 10 years, cardiac care unit.

Publications

Devron H. Char, professor, ophthalmology, Proctor Foundation & radiation oncology; director, Ocular Oncology Unit: Author, *Clinical Ocular Oncology* (Churchill Livingston, NY, 1989).

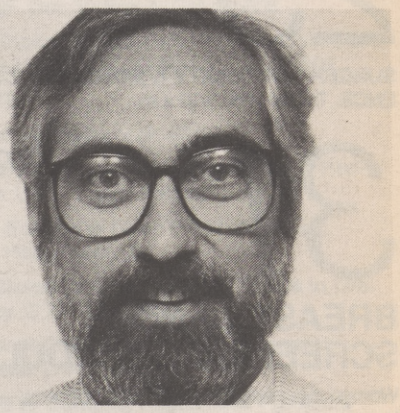
Allan B. Chinen, assistant clinical professor, psychiatry: Author, *In The Ever After: Fairy Tales and the Second Half of Life* (Chiron, Wilmette, IL, 1989). Excerpts from the book are being used in Moffitt Hospital's elder tales program where volunteers read to elderly inpatients. For more information on this program, call Leona Hansen-Nealey at x61196.

Michael J. Aminoff, professor, neurology; director, clinical neurophysiology: Editor, *Neurology and General Medicine* (Churchill-Livingston, NY, 1989).

Roger P. Simon, professor, neurology; chief, neurology, SFGH; **Michael J. Aminoff,** professor, neurology; chief, clinical neurophysiology; **David A. Greenberg,** associate professor, neurology: Editors, *Clinical Neurology* (Appleton-Lange, East Norwalk, CT, 1989).

Edward J. Goetzl, Robert L. Kroc Professor of Medicine; director, allergy, immunology & microbiology-immunology: Co-editor, *Neuroimmune Networks: Physiology & Diseases* (Alan R. Liss, Inc., NY, 1989).

Appointments



EMR

Rodnick

Jonathan E. Rodnick, acting chair, family & community medicine. Coordinator of the Department of Family & Community Medicine predoctoral programs since 1980, he came to UCSF as an intern at SFGH in 1968, was appointed assistant clinical professor in 1975 and professor, clinical family medicine in 1988. A past president of the Society of Teachers of Family Medicine, Rodnick was assistant director of the family practice residency program at Santa Rosa Community Hospital from 1973-85 and health officer and director of the Sonoma County Health Department from 1986-88. His research interests include cancer prevention and the application of computers to medical care. He replaces Donald L. Fink, who continues to teach and serve as chief, family practice service, SFGH.

Hsu

Stella F. Hsu, financial analyst, Office of the Vice Chancellor, Personnel & Student Services: A staff member of the Laboratory of Radiobiology & Environmental Health since 1978, she has been the department's associate director for administration since 1983. In her new position, Hsu is responsible for financial analysis and coordination of the personnel & student services operating budgets, vendor lease projects and coordinating other special programs.

"Women & AIDS" Tops Video Festival

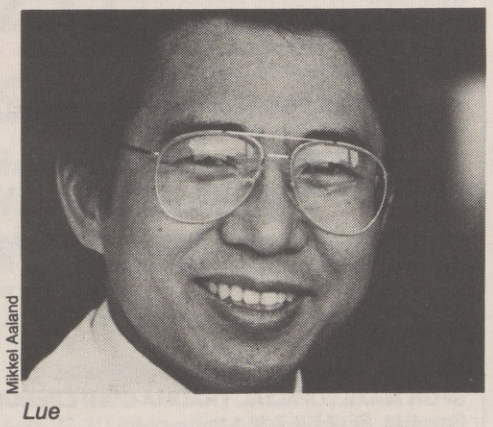
UCSF health educator Terry Looper's videotape on "Women & AIDS: A Survival Kit" captured the top Silver Apple Award at the recent 1989 National Education Film and Video Festival held in Oakland. The video combines commentary by women health professionals on the health aspects of AIDS with personal testimony by women infected with the virus and scenes by professional actors about how to talk about safe sex with a partner.

The 22-minute film, which won in both health and AIDS categories, was produced for the Women's Health Clinic at SFGH to educate heterosexual women of childbearing age about the risk of the AIDS epidemic. It is distributed by the UC Extension Media Center, 642-0460, for small group education sessions.

Looper also produced the "TNT" (Teens 'n Theatre) film about peer counseling at SFGH that uses theatre techniques to educate fellow teenagers about issues ranging from contraception to incest and family violence. This film won first prize in the 1980 SF International Film Festival's education category and a bronze award at the NY International Film Festival.

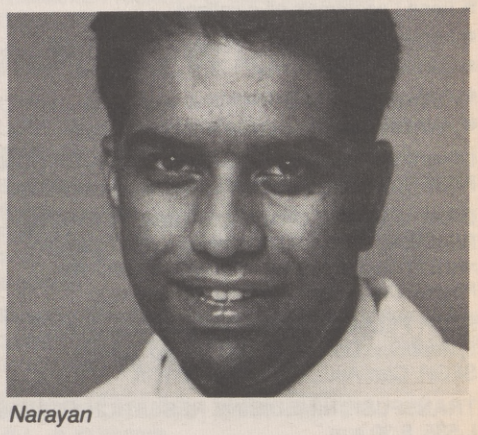
Looper

Four UCSF Urologists Honored

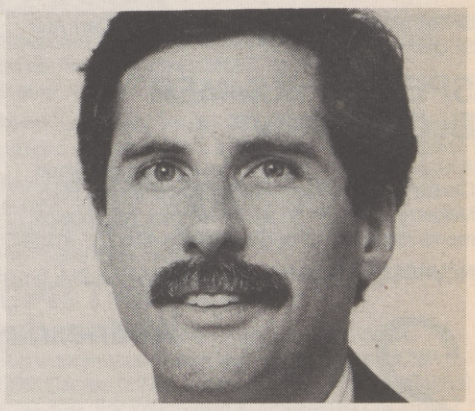


Mikkel Aaland

Lue



Narayan



Carroll

Four UCSF urologists were honored at the recent annual meeting of the American Urological Association (AUA).

- Associate professor Tom F. Lue became the first recipient of the Dornier Award for Innovative Research for his work on the physiology of penile erection and the diagnosis and management of vasculogenic impotence.
- Assistant professor Perinchery Narayan was awarded the First Prize for Clinical Research in the AUA Essay Contest for his work on magnetic resonance spectroscopy study of prostate pathophysiology.
- Peter R. Carroll, also an assistant professor, won honorable mention in the Clinical Research category of the essay contest for his paper on mechanisms of urinary continence.
- And Ruud J.L.H. Bosch, a former visiting research fellow in Emil Tanagho's urology research lab, won the prestigious Jack Lapides Prize for his paper "Synchronized Electrical Stimulation of the Sympathetic and Parasympathetic Innervation of the Bladder: Facilitation of the Initiation of Micturition in the Dog." Bosch has since returned to Erasmus University in Rotterdam, the Netherlands.

UCSF Archives

Soins Hygienique et la Revolution Francaise

In honor of the 200th anniversary of the French Revolution, our library's special collections section has on display an exhibit which illustrates the dramatic transformation of the health profession in that country. "We have brought together materials from mid-to late-eighteenth century which exemplify some of the ideas and individuals who participated in that tumultuous era," explains University archivist Nancy Zinn.

Three major areas are covered in the exhibit: Hopitaux (hospitals), Les Gardes-Malades (the nurses), and Les Pharmaciens (the pharmacists). The exhibit begins in the cases at the entrance to the library on the second floor of Medical Sciences, and continues in the Rare Book Room on the third floor.

One segment of the exhibit includes a textbook from the 1760s designed for young midwifery students by this woman—Angelique Ducoudray.

31 Monday

BREAST CANCER SCREENING SCHEDULE

Women can have low-cost mammograms—x-rays to screen for breast cancer—from a mobile van that travels to convenient locations in the Bay Area.

Women need the approval of their physicians to have the mammogram. The procedure takes approximately 20 minutes and costs only $50. To make an appointment call 990-0459 or x62193 between 9 a.m. and 3:30 p.m.

The van will be at the following locations for the next month:

- July 31-Aug. 4: Marina Green parking lot near Ft. Mason.
- Aug. 7-11: PG&E building on Beale St. near Market.
- Aug. 14-18: Westlake Shopping Center in Daly City on Park Plaza Dr. next to Safeway.
- Aug. 21-22: CED in the parking lot at 15th & Folsom.
- Aug. 23-25: Twin Pines Senior Center, 1365 Fifth Ave., Belmont. For appointments call Deborah Yoder, 595-7444.

MIDPOINT RECREATION REGISTRATION

Half off on fitness & exercise classes. Sign up at MU Fitness Desk. 11 a.m.-1 p.m. & 4-7 p.m. For more information call x61800.*

OVEREATERS ANONYMOUS MEETINGS: *The "H.O.W." Concept.* Presentation & discussion. N 717. Regular OA meeting. N 717B. Noon.*

ANESTHESIA MORBIDITY & MORTALITY CONFERENCE. S 455. 3:30-5:30 p.m.

Benefits/Personnel

Ninety Employees Get A&PS Award

The first set of Administrative and Professional (A&PS) Outstanding Achievement Award winners has been announced, and 90 campus and Medical Center employees are the recipients. The award, which carries a $3,000 cash prize, will be issued on an annual basis, with the number of recipients limited to the available funds that fiscal year. Criteria include the employee's demonstration of outstanding achievement in at least two of these areas: creativity, outstanding performance, organizational abilities and interpersonal skills.

The winners:

Academic Affairs
Janice Babula
Peggy Bagala
Elaine Benson
Merle Blos
Gladys Lew
Marie Rhodes

Chancellor's Office/Sr. Vice Chancellor
Bruce Flynn
Jon Gledhill
Charles Hancock
Mary Kahn
Ronald Kos

A Few Title Changes

Thena Trygstad, formerly called Vice Chancellor-Personnel and Student Services, is now Vice Chancellor-Staff and Student Human Resources.

Accordingly, Chick Francis becomes Assistant Vice Chancellor-Staff and Student Human Resources, and Paula Schultz becomes Assistant to the Vice Chancellor, etc.

Randy Lopez's title has changed from Director of Personnel to Assistant Vice Chancellor-Staff Personnel.

Reception for Three New Colleagues Aug. 2

It's time to officially greet three new top administrative people on campus: David Ernst, Bruce Spaulding and Brent Stevenson. To do so, the Chancellor is hosting a reception on Wednesday, August 2, from 3 to 5 p.m. in the Plaza Atrium of Millberry Union.

So you'll feel more comfortable chatting up a storm with these people, here's a little background and some sample questions:

- David Ernst is the new assistant vice chancellor for information systems. He is from Stanford where he served as director of administrative information services with prior experience at UC San Diego. What to ask David: How's computers these days?
- Bruce Spaulding is the new vice chancellor for university advancement and planning. He joined us last year as vice chancellor for business and fiscal services after serving as county administrator for Fresno County. What to ask Bruce: What did you like about Fresno?
- Brent Stevenson is the new vice chancellor for business and fiscal services. He's from the University of Nebraska where he was most recently hospital director and former vice chancellor for business and finance. What to ask Brent: Will your signature now be on our paychecks?

Now, come up with a few questions of your own:

_____

_____

_____

Now go and join the party!

Black Caucus Officers Installed Aug. 4

Meet the new officers of the UCSF Black Caucus at their installation reception on Friday, August 4, from 3:30 to 6:30 p.m. in the Hartsook Room at CED.

Installed will be: CED ombudsman Ronald Lambert, chair, Black Caucus; Fred Logan of materiel management, vice chair; Edna Mayhand of materiel management, corresponding secretary; Claudette Johnson of the Chancellor's Office, recording secretary; and Dianna Farley of annual giving, treasurer.

Plus the following chairs of committees: Lee Jones of biomedical engineering at SFGH, black culture; Brazola Spencer, Brenda Adams and Shirley Williams, all of patient accounts at CED, fundraising, nominations, membership, respectively; Lloyd Lombard of personnel, promotions & upgrading; Dorothy Ladd of medicine at SFGH, tactics; Terry Kingdom of addressing, student relations & recruitment; Joe Bluford of resource management & planning, investigations; and June Miles of physical plant, publications.

And the following members at large: Joanne Lewis, assistant vice chancellor; Wendell Adams, labor relations; Barbara Wilson, School of Pharmacy; Darlene Collins, student services; and John Watson, biochemistry.

New Surtax for Medicare Recipients

Beginning with 1989 tax returns, certain retirees and active employees age 65 and over who are eligible for Medicare Part A will be subject to a new supplemental Medicare premium or surtax. This surtax must be computed and paid along with 1989 federal income taxes.

The surtax has been established to help pay for new benefits provided under the Medicare Catastrophic Coverage Act of 1988. Employees and retirees who have been eligible for Medicare Part A (hospital insurance) for more than six full months of the 1989 tax year, and who have federal tax liability at or above $150, must pay the surtax.

Note: If you are eligible, but haven't enrolled for Medicare benefits, you still must pay the tax. The key word here is "eligible." If you have questions regarding your Medicare eligibility, be sure to contact your Social Security office.

Also, IRS publication 934 (12/88) can help you decide whether you owe the surtax, and if so, how much. You can get this publication by calling 1-800-424-3676.

Although the surtax isn't due until April 1990, you should budget for it now. You may want to increase witholding from your wages or pension to cover the surtax. Talk to your department's benefits rep.

Pay for Childcare? Buying a House?

If you pay for childcare or if you're thinking of getting a home loan, there are two recently reissued UC Advisory Letters that may be of interest to you.

"DepCare and Tax Reduction" is for employees who pay someone to care for their children or other dependents. It compares the University's Dependent Care Assistance Program (DepCare) with the federal dependent care tax credit and highlights federally mandated changes to DepCare for the 1989 tax year.

"An Introduction to Home Loans" provides information that a first-time home buyer needs to know in order to shop intelligently. It defines and compares different types of mortgages and mortgage lenders, explains the loan application process, presents a worksheet enabling readers to estimate the size of the loan they can expect to get, and provides current information on the tax deductibility of mortgage interest and "points."

Both of these letters are available from your benefits rep.

How Are the Funds Performing?

For those invested in the additional savings programs, here are the latest unit values and monthly factors (as of June 30). If you have questions, please call x69256.

	Monthly Factor	Current Rate
Savings	.0064	7.84%
Money Market	.0076	9.30%
GIC	.0072	8.78%

	Unit Value	1-Month Change	12-Month Change
Bond	$37.67	5.1%	19.11%
Equity	$58.12	-0.9%	15.35%

EMPACT!

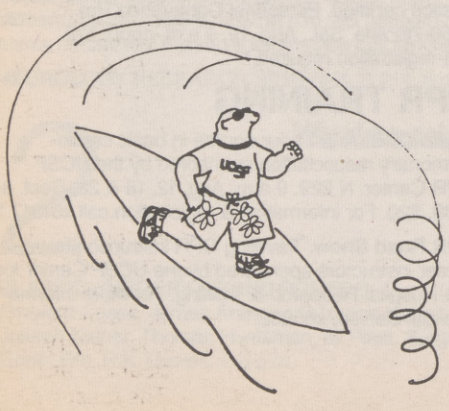
Wash Your Jams—Aloha Wednesday Coming

EMPACT! is having a beach party! Bring your best jams to work on Wednesday, August 23—and at exactly 11:30 a.m., throw off your office clothes, put on your shorts, get yourself out to Saunders Court and enter the "Crazy Shorts Contest."

Other attractions: Volleyball, beach music, a hula hoop contest, and—get this—entertainment by MU's Beach Chair Drill Team.

You can also enter your department in a sand building contest (castles or otherwise). And as far as lunch goes, you can either organize a potluck within your department or buy something at the BBQ luau.

Call EMPACT!, x66932, for more information or to enter the sand contest.



More summer fun:

- **Thursday, August 3—Swing Fever.** Come to the Plaza Grill in the MU plaza at noon and hear this popular Bay Area group play old time swing jazz hits from the 30s and 40s.
- **Sunday, August 6—SF Giants vs. Houston.** "Trading Card Day." 1:05 p.m., lower reserve section 13 seats. $8.50. Buy tickets at EMPACT! table in Med Sci lobby, Monday, Wednesday & Friday, 11 a.m. to 1 p.m., or call x66932 for mail order form.
- **Wednesday, August 16—UCSF/Hanover Corporate Run.** See page 2 for details.
- **Sunday, August 27—Cirque du Soleil.** See the current darling of the circus world, 1 p.m., 4th & King Streets. Adults $20; kids $10. (To buy tickets, see preceding item.)
- **Bicycling adventures with the UCSF Cycling Club**—every Saturday in August. "Powers of the Planet" tour, Cheese Factory Loop, Nicascio Reservoir, Berkeley Hills. Call Alan Tower, x61800.
- **Boardsailing, rockclimbing, kayaking, canoeing**—call Outdoors Unlimited, x62078.

Who is this natty seafarer? Why, it's Academic Senate's Marie Rhodes, who, along with her husband Robert Paige and a couple of dozen friends, recently took a spin in the gorgeous spinnaker sailboat, the Brigantine Rendezvous. *Robert (who recently retired after 27 years as a merchant seaman) won the Bay cruise in the EMPACT! raffle.*

Olympic Medalist Back in the Run Again

Archie Williams, a recent patient on 7 Long, is a man with a riveting history. Not only is he an Olympic gold medalist, but he has three college degrees, all in different subjects, from three different UCs. He's also a meteorologist, a crack pilot and has two planes of his own.

Williams' history, as we know it, began when he was a sophomore at UC Berkeley in 1936. That was the year he went to Berlin to compete in the Olympics, and won the gold medal for the 400-meter dash. Despite the political turbulence in Berlin, this was the same year another black American athlete, Jesse Owens, won several gold medals for track.

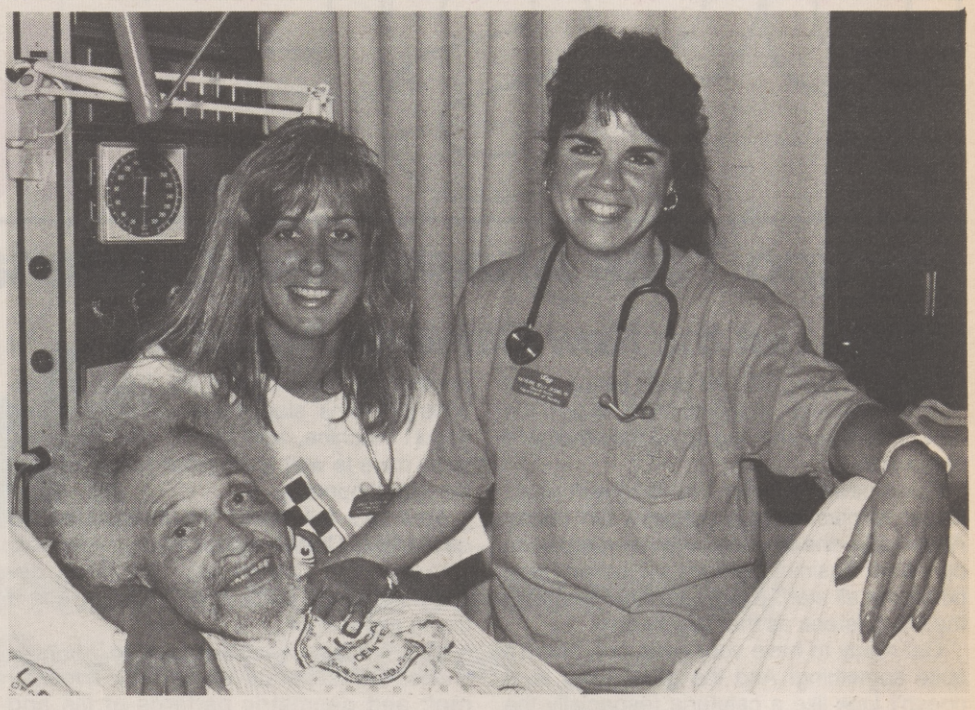
Subsequent leg injuries crimped Williams' running style, so he took up flying while he was finishing college. He graduated from Berkeley in 1939 with a degree in mechanical engineering, and then went on to get his meteorologist credentials at UCLA. At this point he joined the Air Force, got his pilot instructor's license and spent the next 22 years as a TV weather man and pilot instructor with the Air Force.

Williams retired from the Air Force in 1964, promptly enrolled at UC Riverside, got his teaching credential in mathematical sciences and taught high school math in San Anselmo for the next several years.

Now, as a 74-year-old living in Fairfax, he's retired. What that means is that he's got two Cessnas, and "for sort of a hobby" he tows banners across the sky for various Bay Area events.

Recently he's had some trouble with poor circulation in his legs and was here for some vascular surgery. But he expects to be up and running again by the time of UCSF's 125th anniversary celebration on October 14th. He says he'll be happy to tow our banner over San Francisco on the day of the event.

"No charge."



Archie Williams with 7 Long nurses Janice Marchi and Katherine Della Jacono

Ah, the Rewards of Working Here 30 Years . . .

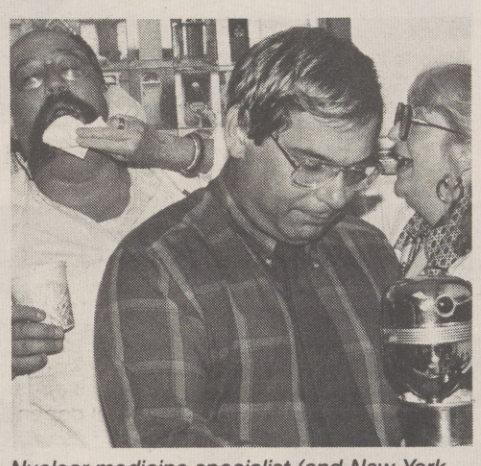
"One way things have changed since 30 years ago," said vice chancellor Thena Trygstad in tribute to Nuclear Medicine's Gwen Leong, "is that these days we do a lot more in the way of staff recognition."

Thena, herself a 30-year-plus employee at UCSF, made a presentation, "A 30-Year Perspective," as part of a whole week of activities in June planned by the Nuclear Medicine department in honor of Gwen's 30th anniversary here.

"Stop by during 'Gwen Leong Week' and congratulate our champion behind the scenes," said the invitation. Gwen is an administrative assistant III in the department.

In addition to the tribute by Thena, the department planned a noontime event each day—banana splits one day, a pizza party the next, etc.; and every day a lotto spin for rather distinctive prizes (a transformer, for instance). *And,* every day Gwen was presented a half dozen roses for a grand total of, yes, 30!

"Gwen and I started here as very tall nine-year-olds," said Thena Trygstad (left) during her tribute to Gwen Leong (right).



Nuclear medicine specialist (and New York native) Eli Botvinick made semi-authentic East Coast egg creams during one noontime fete. Background: Jeff Miller and Duffy Price.

Claudia Braun spins the lotto wheel, which, by some fluke, was numbered exactly 1 to 30. Background: Al Alali and Bobbie Edwards.

Gwen, on day five.

After the Ribbon Cutting

The newly renovated Moffitt 8 South wing recently opened to the tune of a trumpet-call: First a ceremonious ribbon cutting, then a presentation of flowers to Facility Planning's Joyce Terrien, who, according to head nurse Margie Wolcott, "attended to every last detail" throughout the project.

The 8 South project is part of an overall modernization plan to bring Moffitt Hospital, built in 1955, up to date. "The rooms all have private baths now," says Margie, "and they're equipped to accommodate our current level of patient care."

Now, several corridors on the eighth and ninth floor are closed as further wings are being remodeled. Check your *Constructive Comments* for the details.

P.S. 8 South is now what 8 NE used to be—the neurology unit. (8NE, now closed for remodeling, will become part of the ICU.) "We're just calling our unit 8 Moffitt these days," says Margie.

Joyce Terrien, after the ribbon cutting

Hello Again, Ella Cahn

Last year at this time we introduced Ella Cahn, who, although a relative newcomer to the Auxiliary, was being installed as the organization's new president.

After a year of corroborating, assimilating, communicating, mediating, calculating, articulating and organizing, to say she has her feet wet is an enormous understatement. How fitting it is, therefore, that she's taking on a second term as president.

At the Auxiliary's annual meeting, Ella outlined the accomplishments from last year: The remodeling (and increased profitability) of the "Bearly New" thrift shop, the increase in membership from 140 to 175; the various fundraisers, including the Andrew Wyeth party, art sales, various gift sales, etc.; and the selection of seven "special projects," which were outlined in the last issue of *Medsounds*.

She also provided a forecast for the coming year, which will include, beginning this fall, an outer wear sale in October and a one-day art sale in November. She noted that suggestions for fundraisers are welcomed. If you have a good one, send it to the Auxiliary at Box 0208 or call the office at x64906.

Your Artwork Needed

The Auxiliary is soliciting donations for a one-day art sale here on campus, scheduled for November 15. Please call the Auxiliary Office at x64906 if you have something to contribute.

New Auxiliary Officers: (left to right) President Ella Cahn, president-elect Ilse Steinbach, treasurer Betty Silverman, third vice-president Dora Mustacchi, secretary Betty Hine, second vice president Marylyn Pickler and advisor Dan Shydler. Not shown: First vice president Bobbie Kaiser.

Oh, Honored Ones

Materiel Services' Earl McCowen, Accounting's Robin Samples and Nursing's Lynda Purves were three of 31 Medical Center employees honored at the A&PS awards luncheon hosted by Bill Kerr. See page six for the complete list of campus and Medical Center winners.

New Cafeteria *(continued)*

As you can see, Moffitt Cafeteria will never be the same. In fact, how can we even call it "Moffitt Cafeteria" anymore?

"Don't worry, we're going to change the name to something less institutional," says manager Marilyn Jacobson. And also don't worry—they're not going to have a contest to come up with a new name.

P.S. When the new cafeteria opens, there will be a slight change in hours. Food service will still open at 6:30 a.m. for breakfast and night meal service will end at 2 a.m. But the cafeteria will completely close every day from 10:30 to 11 a.m. for cleaning and restocking prior to lunchtime. The reason? "All the better to serve you."

Exciting Time Ahead! New Cafeteria, New Birth Center Open in August

Check Out the New Cafeteria August 25

All these months you've been sitting there eating your lunch, trying to imagine how the new cafeteria is shaping up on the other side of the wall.

Good news: You don't have to wait much longer to placate your curiosity. On Friday, August 25—the day before the new cafeteria opens for business—there will be an open house for all staff. (Details will be posted in the old cafeteria as the date nears.)

Get ready to have your eyes pop out! It's quite something! And the great thing is, it doesn't *look* like a cafeteria (especially the former one).

The serving area is all brass, tile and oak; and, instead of being all clumped together, it's divided into many stations. Thus, you can pick the one that suits your appetite instead of queuing up with the masses.

There's a take-out station with pre-wrapped items (with a cashier nearby so you can make a quick get-away), a grill for hamburgers and omelettes that will be served all day, a station for hot entrees, another for made-to-order sandwiches, two great big salad bars (that will include fruit and toppings), a pastry case, a station just for drinks, another for hand-dipped ice cream, a "notions & potions" stop, a new and better frozen yogurt machine, and lots of other features you'll have to wait to discover for yourself at the grand opening.

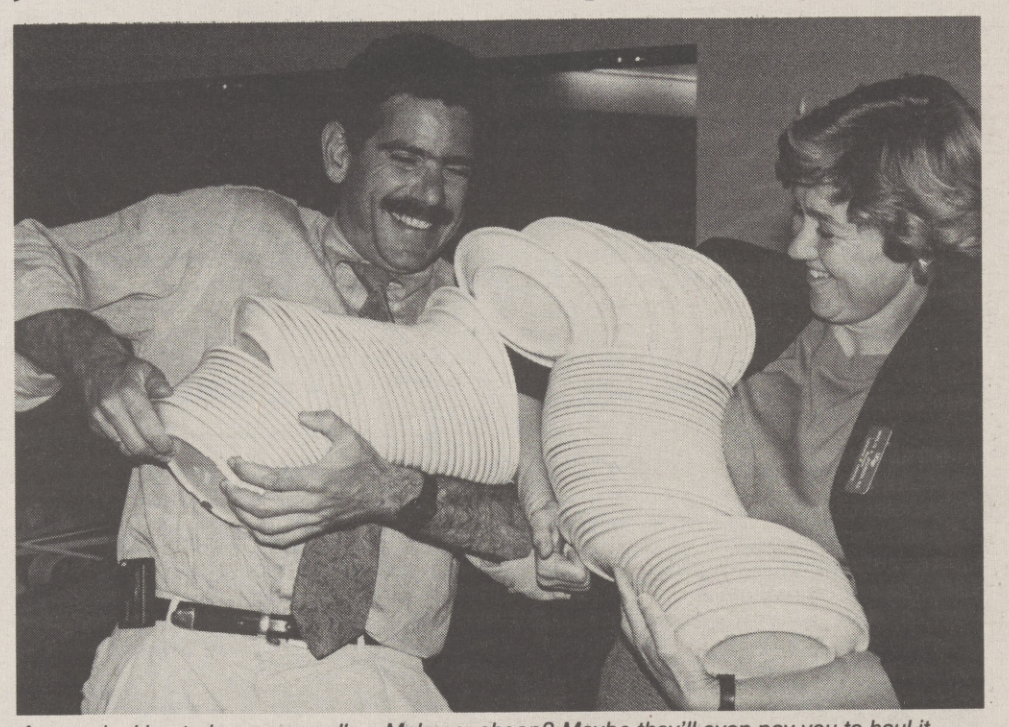
Now let's talk about the dining area. To quote Rick Crane, author of the venerable *Constructive Comments*, "It's been designed not as a mess hall, but to provide a dining experience.

"There will be islands of seating," he continues, "with separate tables, like in a restaurant; and geometric patterns of tile and carpeting." You'll find out exactly what he means when you attend the opening.

Furthermore, the new space seats 280, plus 40 more in a reserved dining area. Compare this with the Golden Gate Room, which seats 130. (The Golden Gate Room is the remaining side of the old cafeteria, which has been serving as the entire dining area during the construction.)

As soon as the new cafeteria opens, the Golden Gate Room will close for remodeling. When it's finished—sometime in the fall—the total dining area will seat 535 people.

(continued on page 7)



Anyone looking to buy some yellow Melmac, cheap? Maybe they'll even pay you to haul it away. Contact Facility Planning's Rick Crane (left) or the cafeteria's Marilyn Jacobson (right) if you're interested. (One of the features of the new cafeteria is non-Melmac serving ware.)

Check Out the New Birth Center August 14

Here's another grand opening you're invited to attend: On Monday, August 14, come up to 15 Long between 5 and 7 p.m. and take a look at the brand new Birth Center.

The Center, which has been built to consolidate the inpatient obstetrics services of Mount Zion and UCSF, features rooms that reputedly look just like the drawing. "It's first-class all the way," says Planning & Marketing's Jackie Jew.

She elaborates: These are elegantly furnished private rooms that are designed for labor, delivery *and* recovery. Furthermore, they quickly convert to fully equipped delivery rooms in case of complications.

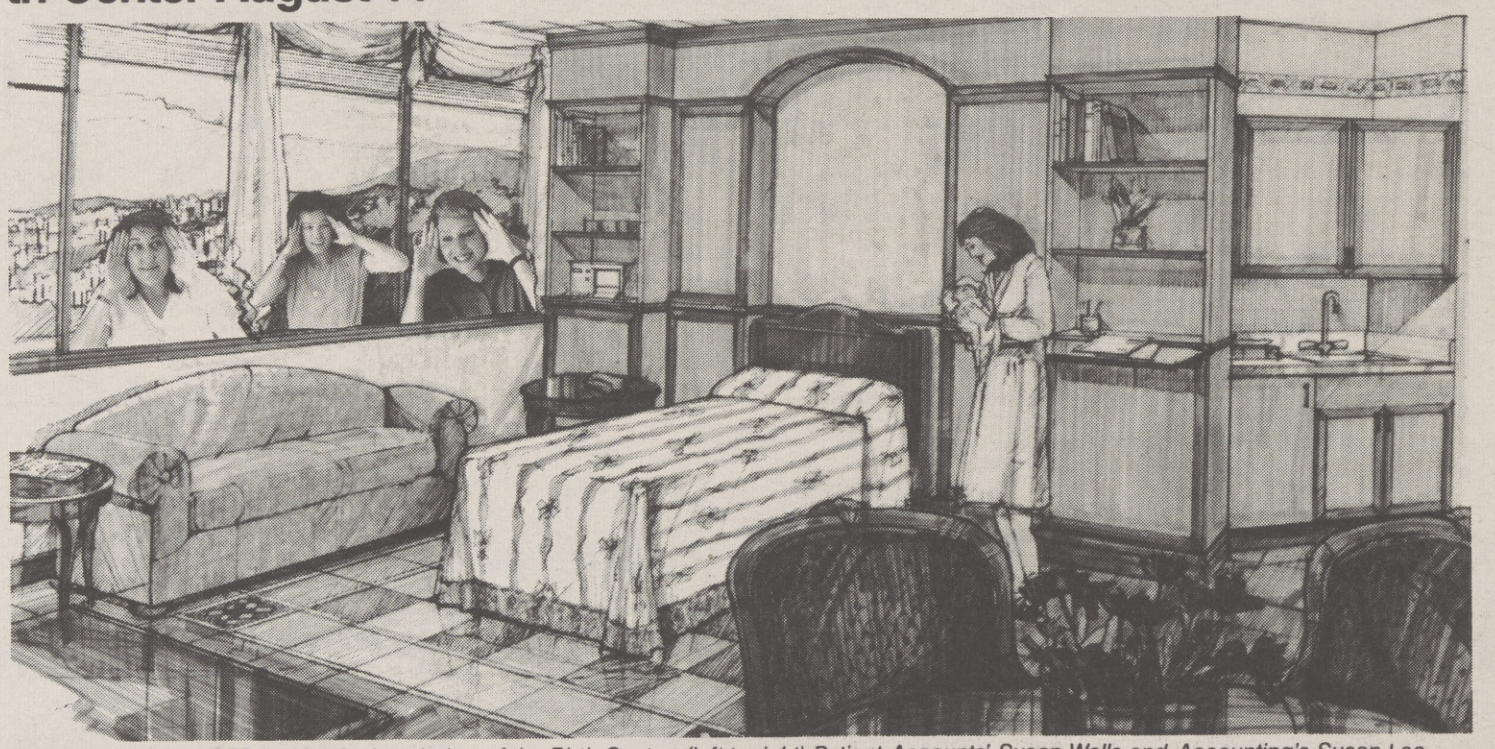
All the rooms (get this) have Jacuzzis in the bathrooms, refrigerators stocked with popsicles and ice chips, and chairs that convert to sleepers for family members. And, of course, the views are second to none.

What's going on here? A big image change?

"Actually, we've always had a family-centered philosophy that paid a great deal of attention to special needs and individualized care," says Jackie. "In fact, the Medical Center here was one of the first hospitals in the West to offer the alternative birth center option.

"Let's just say, now we have a first-class birth center to match our first-class care."

The completion of the Center does represent a milestone in the development of the UCSF-Mount Zion Joint Perinatal Program.



Three Susans from CED looking in the window of the Birth Center: (left to right) Patient Accounts' Susan Wells and Accounting's Susan Lee and Susan Andrews.

When the program is in full swing, the Birth Center will provide all inpatient care, including high-risk care for moms and babies. There will be a variety of prenatal care choices, however, provided by both UCSF and Mount Zion resources. You can find out all about these choices by calling 476-MOMS.

P.S. The Birth Center will host a public open house on Saturday, August 12, from noon to 4 p.m. You of course can attend that instead (or also)—and bring your family.

Materiel Services Takes the Bowling Trophy (or) Barb Norrish Takes Off

Congratulations, Barbara—you won the Materiel Services "low score award."

The facts that 1) Materiel Services won the bowling trophy from Nursing and 2) Barbara Norrish has left the Medical Center are related, but it takes some explanation.

A couple of weeks ago, the Materiel Services "Nurse Busters" and Nursing's "Strike Force II" held their second annual bowling challenge at Park Bowl, and this year, Materiel Services took the trophy away from Nursing.

The score was 3,838 to 3,612—which was three six-member teams for both sides playing two full games each. You may personally view the trophy by visiting the lobby of Materiel Services on the ground floor of Moffitt.

There also were some plaques awarded for high and low scorers. Materiel Services' Roy Brooks got the "high score award" for bowling a 169; and Nursing's Michael Coker (OR) won it for his 197 score. "Low score award" for Nursing went to the team member who also was the youngest player—Jennifer Dickman's seven-year-old son, Christopher.

Now, here's the part about Barbara Norrish. Since most people know Barb as the assistant director of nursing over the critical care division, it may be confusing to learn that she won the Materiel Services low score award. But Barb had her last day at the Medical Center the day before the bowling match. She's left for Alta Bates, where she's now the project coordinator for a utilization management study (how to deliver quality care in the most cost efficient manner).

Technically, she no longer was a nursing employee, so, to pay their respects, Materiel Services invited her to be an honorary member of their team. She accepted, but didn't end up playing, so she didn't get any points—thereby earning the low score plaque and something to help her remember her friends in Materiel Services.
